caveat - still need to QC samples

- notified KC Env office yesterday afternoon

1000 ppm → 75% K ppm

18 samples being analyzed

1 wipe from stained carpet

remainder from light footstool

50 ppm reg. limit

6 modules, each sampled

Dr Plan, Dir KC Health

1/15 went and this can + potation

Karen low potential for acute

- conc is env ex fish

exposure comp - through air - haven't seen it

drop on rug - would have to rub on continuous
messing - not a lot of risk

130 children (age ~ 10 yrs
12 classrooms 6 rooms KC doesn't want
to say - 10 yr hist of nppi, leader (not)
facility cleaned before inspection (parent
ver human tests?)
- not real information
- doesn't change treatment

Get kids out until can do more
message to parents

authorities to remove kids
DSHS can

Daglow Director expecting RPT from EPA

how long to remediate?

assmt. contractor would do further
assmt at facility (characterization)

TSCA - owner/operator very

remediate

EPA regulator
